Simformotion™ LLC Announces Release of Hydraulic Excavator Simulator System

Simformotion™ LLC, Morton, Ill.—a leader in heavy equipment simulator training solutions—announces the release of its new Hydraulic Excavator Cat® Simulator System. Operators can learn the same machine applications found on actual worksites, but in the safety of a virtual environment! Authentic controls and rich graphics set the stage for users to learn several different simulated training exercises: Controls Familiarization, Machine Walkaround, Bucket Placement, Raking the Green, Over the Moon, Loading & Off-Loading from a Low-Boy Trailer, Truck Loading, Bench Loading, Setting Trench Box & Pipe, Trenching, Backfilling, Production Cycle, Quick Coupler and a special Open Training mode. Plus, exclusive reporting features mean all simulator sessions are measured and recorded so instructors and users can track user progress. Customize simulator training based on organizational or individual needs. The PC-based simulator system offers the user the most engaging experience in virtual training today!

Vice President Lara Aaron says, “Leveraging simulation technologies to help clients train their heavy equipment operators safely and cost effectively is core to Simformotion’s business. We deliver innovative simulator technology to help our client organizations save costs on training and increase safety awareness, while giving heavy equipment operators the tool they need to build skills to enhance production techniques.”

Special features on the Hydraulic Excavator Simulator System such as multiple languages; Track IR optical motion tracking controller, which tracks and responds to operator head movements; Butt-kicker, which gives the sensation of feeling heavy equipment movements; and companion tablet eBook training set Cat Simulators apart from any other heavy equipment simulation trainer available today!

In addition to the Hydraulic Excavator, Cat Simulators are available in models for the Dozer, Off-Highway and Mining Trucks, M-Series Motor Grader, Small and Large Wheel Loaders and Wheel Tractor-Scraper. For more information, visit www.catsimulators.com.

About Simformotion™ LLC

Simformotion LLC—a leader in heavy equipment simulator training solutions—is a licensee for Caterpillar Inc. Cat heavy equipment simulators deliver dynamic training technology and outstanding safety results through the power of state-of-the-art virtual training. Operator training simulators can help businesses dramatically lower costs and address initiatives such as safety and production; while ensuring training can be delivered anytime day or night, regardless of weather

conditions. Cat Simulators are chosen as training solutions in such markets as mining, contracting, trade unions, government and trade and vocational schools. Simformotion LLC is an affiliate of CSE Software Inc.
